

GYLON Product Application Case Studies

Case Study 1: Chemical Processing Plant

Industry: Petrochemical Manufacturing

Challenge: Frequent gasket failures in sulfuric acid service

Solution: GYLON 3504 gaskets installed on all acid lines

Results:

- Zero leakage incidents over 3-year period
- 85% reduction in maintenance costs
- Extended turnaround intervals from 6 to 18 months

Case Study 2: Pharmaceutical Manufacturing

Industry: Active Pharmaceutical Ingredients (API)

Challenge: FDA compliance and product contamination concerns

Solution: GYLON 3510 FDA-compliant gaskets

Results:

- Passed all FDA validation tests
- Zero product contamination incidents
- Improved cleanroom performance

Case Study 3: Pulp & Paper Mill

Industry: Paper Production

Challenge: Steam leaks causing production downtime

Solution: GYLON 3500 high-temperature gaskets

Results:

- 95% reduction in steam leaks
- Annual savings of \$250,000 in energy costs
- 40% improvement in system uptime

Case Study 4: Food & Beverage Processing

Industry: Dairy Processing

Challenge: Frequent gasket replacement in CIP systems

Solution: GYLON 3510 sanitary gaskets

Results:

- Extended gasket life from 3 to 24 months
- Reduced cleaning cycle times by 30%
